

Resources Cleanup

- ECS:
 - Fargate services
 - Task definitions
 - Deregister
 - Delete Inactive task definitions
 - Delete the cluster
- Cloud Map
- Code pipeline
- Code build
- Code commit
- ECR repos
- Secrets Manager
- RDS
 - DB Instance
 - It will take sometime. do not forget to check this later!
 - DB subnet groups delete (if possible.. or check later)
- ALB
 - Delete listener rules
 - Delete ALB
 - Delete Target Groups
- EC2
 - delete AMI
 - deregister AMI
 - delete Snapshot
- VPC
 - NAT (wait for couple of mins)
 - Release Elastic IP
 - Delete SG
 - db
 - alb
 - app
 - VPC itself
 - Create default VPC
- CloudFront
 - disable first (wait for this to “deploying” to complete)
- S3
- IAM (There is no charge for this! However it is better to delete the users we do not plan to use)
 - User Groups
 - Users
 - Roles created by us
